

PRIVACY WEEK 2024

THE PRIVACY CROSSWORD

Serious about privacy. Playful about learning.

Across

- 5. Ensuring privacy laws and regulations are respected (Following legal and regulatory privacy requirements.)
- 7. Users always know what's happening with their data (Clear visibility into how data is collected, used, and shared.)
- 9. Users must say "yes" before data is collected or used (Clear, informed permission given by the individual.)
- 10. Collect only the personal data that is needed (Limit data collection to what is necessary for a specific purpose.)

Down

- 1. Protecting personal data from breaches and attacks (Safeguards that prevent unauthorized access or misuse.)
- 2. Taking responsibility for protecting personal data (Someone is clearly responsible and answerable for data protection.)
- 3. A secret code that ensures only authorized people can read data (A technical method that transforms data so it can only be read with the correct key.)
- 4. What happens when data falls into the wrong hands (Unauthorized access, disclosure, or loss of data.)
- 6. Managing how long personal data is stored (Keeping data only for an approved period, then deleting it.)
- 8. The written rules that define how personal data must be handled (Formal privacy requirements that guide employee behavior.)
